Requirements and Files used

Requirements

Running this Project requires Python Notebook and the instalation of the following libraries:

- o collections
- o imblearn
- o folium
- o xgboost
- o mlens
- o lime

Files used in the Project

- o Raw_data_TFM.CSV (unzip file required)
- o Spain_provincias (used to map with geopandas. Unzip file required).
- o Pobmun19.csv (included as part of the previous work with SAS to add number of population by province. Information included from INE website). Information already included in the Raw_data_TFM file.

Although the initial information included in the dataset is real, in order to present this work and to comply with current regulations, all data has been anonymized.
